

UNIZ NBEE – SCHEU Edition

The world's fastest dental printer

The game changer for dental laboratories and practices: Highly precise results in record time

- Up to 6 arch-shaped models in under 10 minutes
- Top resolution of 49 µm
- Ideal for models, splints, aligners and much more
- Modern water cooling and high-quality components
- Touch display operation
- Data transfer optionally via WLAN/Lan or USB

Increase productivity and flexibility in the laboratory and practice

Do away with waiting. The **UNIZ NBEE – SCHEU Edition** combines record speeds with a large building platform, impressive precision and highly convenient operation.

This benefits you in your daily laboratory and practice routine on many levels:

- **Time-efficient working:**
You reduce the time required for the fabrication of models to a minimum, are less bound by printing processes and can plan flexibly.
- **High productivity:**
You multiply your output even when the requirements are complex.
- **Simple processes:**
You make processes easier thanks to modern software and intuitive operation.
- **Minimal maintenance:**
You can concentrate on your core business because you can rely on your technology.
